inspHire adds Asset Tracker

Rental software supplier inspHire has launched a new asset tracking functionality 'Asset Tracker' that integrates fully with most popular telematics systems, including Trackunit, JCB LiveLink and CanTrack.

The Asset Tracker runs alongside inspHire's centralised telematics data within its rental management software. As part of the integration package, Trackunit, JCB Live Link and CanTrack can be opened directly from within the inspHire system, eradicating the need to have two systems open at the same time, whilst also making advanced telematics data easier to access.
