

Magni to supply Bobcat

Thursday, 10 December 2020 (#1004) - Castelfranco Emilia, Italy

The new Bobcat line made by Magni

Magni TH has signed an OEM agreement with Bobcat to supply a range of the latest rotating telehandlers. Under the deal, Magni will supply Bobcat with rotating telehandlers ranging from 18 to 39 m. Built at the new Magni TH facilities, the new range of roto telehandlers will feature Bobcat branding and colours and they will include all the latest technologies such as Stage V engines, advanced ergonomics and safety and the latest standard compliance. The agreement covers Europe, Russia, the Middle East, Africa and Latin America. Magni TH founder and president Riccardo Magni says: "Bobcat's strength in the materials handling and construction sector is renowned around the world (and) coupled with my 40 years' experience in the design and production of innovative products will mean that the Bobcat materials handling range will be an even greater force to be reckoned with. "For Magni TH, this is a further step to grow and consolidate the presence in the global markets and to confirm the leadership in the rotational telehandler segment," he adds. Magni TH is confident it has the capacity to produce 3,500 rotating machines per year, using its new 35,000 sqm production facility in Castelfranco Emilia near Modena, in addition to the existing 6,000 sqm plant. Magni will continue to sell its comprehensive range of fixed-boom telehandlers and electric and diesel scissor lifts under its own brand.
