Magni to supply Bobcat with rotating telehandlers.

Magni TH has signed an OEM Agreement with Bobcat to supply a range of the latest rotating telehandlers. The new Bobcat rotating telehandler range includes ten Stage V compliant models for the European market, with lifting heights from 18 to 39m and lifting capacities from 4 to 7t . These are complemented by another four Stage IIIA engine powered models aimed at the Middle East, Africa and Russia/CIS regions with lifting heights from 18 to 25m and lifting capacities from 4 to 6t.

Built in the new Magni TH facilities, this new range of roto telehandlers will be in Bobcat colours, branded Bobcat and they will feature the latest technology in term of engines, cab comfort, safety and standard compliance.

The agreement covers the European, Russian, Middle Eastern, African and Latin American markets.

Magni TH founder and president of the company, Riccardo Magni, said, “Bobcat’s strength in the material handling and construction sector is renowned around the world, coupled with my 40 years’ experience in the design and production of innovative products will mean that the Bobcat material handling range will be even greater force to be reckoned with.

“For Magni TH this is a further step to grow and consolidate the presence in global markets and to confirm the leadership in the rotational Telehandler segment”

With the new 35.000sqm production facility in Castelfranco Emilia near Modena, in addition to the existing 6000sqm plant Magni TH will have the capacity to produce 3500 rotating machines per year.

Bobcat launched the Magni telehandlers on the market on 2 December.
