Magni electric scissors

Magni has added Dingli's new 65ft JCPT2212DC narrow aisle and 65ft JCPT2223RTB Rough Terrain electric scissor lifts to its range.

The 1.25-metre-wide Dingli JCPT2212DC becomes the Magni ES2212E with 22 metres working height and a platform capacity of 600kg. The overall length is 4.72 metres and it is rated for both indoor and outdoor use. Powered by a heavy duty 48V 620Ah battery pack, features include non-marking tyres, automatic pothole protection and levelling jacks as well as a 1.8 metre unrestricted capacity deck extension which takes the platform length to 6.1 metres. Total overall weight is 12.3 tonnes.

Magni has also added Dingli's recently launched 65ft JCPT2223RTB Rough Terrain scissor lift (see: [65ft DC scissor from Dingli](#)) to its range, which is sold through Magni telehandler distributors across Europe. Dingli acquired a [20 percent stake in Magni](#) in 2016 and provides Magni branded aerial work platforms to the company, while Magni has been responsible for developing Dingli's latest boom lifts through its European design centre based at the Magni plant in Italy.
