Kirby Smith adds Magni.

Magni Telehandlers has appointed Kirby-Smith Machinery of Oklahoma City as its dealer for Oklahoma and West Texas. Kirby Smith operates from 12 locations across Oklahoma, Texas, Kansas, and Missouri.

Oklahoma City branch manager Colin Brown said: "The Kirby-Smith family is proud to announce our recent partnership with Magni America. Magni's line of rotating and heavy lift telehandlers are game changing products for many of our existing construction partners and gives Kirby-Smith a chance to develop relationships with new partners that normally operate outside our core product range. We are all very excited about the opportunities that lie ahead."

Joe Leinwol of Magni America said: "Kirby-Smith's unwavering commitment to their customer success and strong safety culture is in alignment with our philosophy. They're a great addition to our nationwide dealer network and we're looking forward to a productive partnership." Kirby-Smith has been fully trained in the application, sales, parts, and service of Magni's products, and is ready to introduce the benefits of Magni to their customers."

Kirby-Smith was established in 1983 with branches in Oklahoma City, Tulsa, McAlester, Kansas City, St. Louis, Dallas, Fort Worth, Abilene, Amarillo, Odessa, Lubbock, and Waco. It offers Manitowoc, Grove, JLG and SkyTrack.
