IF YOU DREAM IT, YOU CAN DO IT.

Riccardo Magni - Chairman & CEO

We build the future.

The future doesn't just happen; it has to be built, day by day. For Magni, the future has meant challenges, enterprise and innovation since 2013.

This vision, embedded in our brand's DNA, is expressed in a constant commitment to the research and development of new solutions and new technologies.

ATTACHMENTS

COLLECTION

PLATFORMS

Magni offers a wide range of platforms to offer safe access at any height. From standard models to highly specialised ones, we can provide the perfect solution for any application, whether in construction or large maintenance projects.

Section 1

FORK CARRIAGES

Ideally suited to even the most demanding applications, like quarries and mines, our fork carriages can handle any job even under extreme conditions. From simple fork carriages to heavy-duty units with oversized forks, we have the best solution to get the job done.

Section 3

WINCHES

Our winches offer unbeatable performance for effortlessly lifting and moving loads. Compact and robust, these first-class attachments offer Magni's hallmark quality in every detail.

Section 2

LATTICE BOOMS WITH/ WITHOUT WINCH

Precise and versatile, lattice booms are the ideal solution, whatever the job. They easily adapt to varying conditions, always offering the best solution to any problem.

Section 4

HOOKS

Simple and yet extremely versatile and durable, Magni type-approved hooks have a vast range of applications in construction. The range includes hooks of various load capacities in response to specific requirements, always with the best performance.

Section 5

BUCKETS

Developed for the construction and maintenance sectors, our buckets are available in a range of lifting capacities, and are known as reliable partners in any industrial application. Like all our attachments, they offer Magni's guaranteed performance and quality.

Section 7

CLAMPS

Designed specifically for mining and quarrying applications, as well as the logistics sector, our clamps offer unrivalled versatility and performance. The range has been specifically designed to handle even the toughest conditions.

Section 6

SPECIAL EQUIPMENT

This category covers our attachment range for specialised applications. From removing large trees to cleaning roads with snow ploughs or installing glass panels high up on tall buildings - Magni always has the best solution for specialised requirements.

Section 8

PLATFORMS

Magni offers a wide range of platforms to offer safe access at any height. From standard models to highly specialised ones, we can provide the perfect solution for any application, whether in construction or large maintenance projects.

Check the compatibility and capacity of each attachment with your dealer.

PLATFORM, 550 LB

ATT-01-001

Fixed platform with a maximum load capacity of 550 lb, type-approved to carry two operators. Galvanised, reinforced steel structure. Non-slip floor for increased operator safety even in wet conditions.

TELESCOPIC PLATFORM, 440 LB

ATT-01-022

Telescopic platform with a maximum load capacity of 440 lb, type-approved to carry two operators. Its telescopic boom extends the machine's maximum height with a standard platform by up to 33' 5". Galvanised, reinforced steel structure. Non-slip floor for increased operator safety even in wet conditions. Rotation (+/- 90°) provided by a hydraulic rotating actuator.

CHECK FOR ANY PREARRANGEMENT REQUIREMENTS

TELESCOPIC PLATFORM, POSITIVE/NEGATIVE, 550 LB

ATT-01-024

Telescopic platform with a maximum load capacity of 550 lb, type-approved to carry two operators. Enables work in positive and negative positions. This makes it ideal for maintaining viaducts and all applications requiring access to hard-to-reach positions. The working mode can be changed from positive to negative hydraulically, thus ensuring operator safety. Galvanised, reinforced steel structure. Non-slip floor for increased operator safety even in wet conditions.

TELESCOPIC PLATFORM, 1,000 LB

ATT-01-004

Telescopic extensible platform with maximum capacity of 1,000 lb and approved for three people. Thanks to the telescopic boom with which it is equipped, it allows for a maximum working height of 39' 4" more than a standard platform. Galvanised and reinforced steel structure. Non-slip floor design to ensure greater operator stability even in wet conditions. The 360° rotation with closed boom combined with the +/-20° angular correction with the boom extended, makes this platform a cutting-edge solution for working at height.

TP 4.5.10

MINING PLATFORM, 1,000 LB

ATT-01-027

A special platform for use in mines, with a maximum load capacity of 1,000 lb, type-approved to carry two operators. It is equipped with an integral protection grille over the platform to protect against falling debris. The grille is equipped with anti-crushing sensors for increased protection against human error. Galvanised, reinforced steel structure. Non-slip floor for increased operator safety even in wet conditions. The base of the platform is equipped with fork insertion points.

EXTENDABLE ROTATING PLATFORM, 2,200 LB, FOR ASBESTOS MITIGATION

ATT-01-018

Special platform for asbestos removal from elevated positions with a load capacity of 2,200 lb, type-approved to carry two operators. It features two closed stations to accommodate the operators with enabling pedal switches. Both operators must depress their pedal before the platform will move. This makes it possible to move and transfer materials on the roof with the front bulkhead folded down. Non-slip floor for increased operator safety even in wet conditions. The platform is equipped with an overload sensor and rack with anti-shock system to ensure smooth, rotational movements when stopping and starting.

**REAR BOOM WINCH, SINGLE
PULL 6,600 LB / DOUBLE
PULL 13,200 LB - FOR RTH
13.101, FOR ROAD USE**

ATT-02-013

Winch configurable for two load capacities: 13,200 lb double pull and 6,600 lb single pull, equipped with a type-approved swivel hook. The attachment is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering. Improved performance compared to the W6 due to its configuration with the drum mounted on the boom and not directly fastened to the winch.

WB 6				
13,200 / 6,600 lb	0.5"	312' (single pull 6,600 lb) 156' (double pull 13,200 lb)	105 ft/min (single pull) 56 ft/min (double pull)	✓

REAR BOOM WINCH, SINGLE PULL 8,800 LB / DOUBLE PULL 17,600 LB - FOR RTH 17.87, FOR ROAD USE

ATT-02-005

Winch configurable for two load capacities: 17,600 lb double pull and 8,800 lb single pull, equipped with a type-approved swivel hook. The attachment is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering. Improved performance compared to the W6 due to its configuration with the drum mounted on the boom and not directly fastened to the winch.

WB 8				
17,600 / 8,800 lb	0.6"	289' (single pull 8,800 lb) 144' (double pull 17,600 lb)	144 ft/min	✓

SINGLE PULL WINCH 6,600 LB / DOUBLE PULL WINCH 13,200 LB / TRIPLE PULL WINCH 17,600 LB

ATT-02-014

Winch configurable for three different load capacities: 17,600 lb triple pull, 13,200 lb double pull and 6,600 lb single pull, equipped with a type-approved swivel hook. The attachment is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

With a lighter weight construction than conventional 17,600 lb winches, this model has been developed specifically to maximise the performance of RTH machines rated for 17,600 lb loads.

W 3/6/8

FORK CARRIAGES

Ideally suited to even the most demanding applications, like quarries and mines, our fork carriages can handle any job even under extreme conditions. From simple fork carriages to heavy-duty units with oversized forks, we have the best solution to get the job done.

Check the compatibility and capacity of each attachment with your dealer.

FLOATING FORK CARRIAGE 6,600 LB

ATT-03-016

Fork carriage with a load capacity of 6,600 lb. The 3' 11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FCS 3T FIX			
			
6,600 lb	3'11"	0.7' (min.) - 3'5" (max.)	✓

FEM FORK CARRIAGE 6,600 LB

ATT-03-034

FEM fork carriage with a load capacity of 6,600 lb and width of 3' 5". The 3' 11" long, laterally sliding forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks.

FCFS 3T FIX			
			
6,600 lb	3'11"	0.8' (min.) - 3'5" (max.)	✓

FEM FORK CARRIAGE 6,600 LB WITH SIDESHIFT

ATT-03-066

FEM fork carriage with a load capacity of 6,600 lb and width of 3' 6". The 3' 9" long laterally sliding forks are controlled directly from the cab with a hydraulic sideshift, and are ideal for handling all types of palletised loads and any other application requiring non-floating forks.

FCTF 3T FIX			
6,600 lb	3' 9"	1' 2" (min.) - 3' 2"(max.)	✓

FEM FORK CARRIAGE 6,600 LB WITH SIDESHIFT AND POSITIONER

ATT-03-068

FEM fork carriage with a load capacity of 6,600 lb and width of 3' 6". The 3' 9" long forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks. Equipped with a positioner to hydraulically move the individual forks and a hydraulic sideshift to slide them laterally, directly from the cab.

FCPT 3T FIX			
6,600 lb	3' 9"	1' 2"(min) - 3' 4" (max)	✓

FEM FORK CARRIAGE 6,600 LB WITH POSITIONER

ATT-03-067

FEM fork carriage with a load capacity of 6,600 lb and width of 3' 6". The 3' 9" long forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks. Equipped with a positioner that moves the individual forks hydraulically.

FCS 3T FIX			
			
6,600 lb	3' 9"	1' 2"(min) - 3' 4" (max)	✓

FEM FORK CARRIAGE 5,500 LB, SIDE TIPPING - FOR EMPTYING BINS

ATT-03-054

FEM fork carriage with side tipping, enables the operator to quickly unload bins by tilting the fork carriage sideways. Thanks to the continuous 360° rotation, the bins can easily be returned to the pick-up position in one smooth movement. With a load capacity of 5,500 lb, the unit is particularly suited to applications in agriculture, logistics and recycling, for optimised productivity and more efficient operation.

RFCFS 2,5 FIX			
			
5,500 lb	3' 9"	0' 6" (min) - 3' 3" (max)	360°

FLOATING FORK CARRIAGE 10,000 LB

ATT-03-042

Fork carriage with a load capacity of 10,000 lb. The 3'11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FC 4,5T FIX

			
10,000 lb	3'11"	1'11" (min.) - 3'5" (max.)	

FLOATING FORK CARRIAGE 11,000 LB

ATT-03-039

Fork carriage with a load capacity of 11,000 lb. The 3'11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FC 5T FIX

			
11,000 lb	3'11"	0.7' (min.) - 3' 5" (max.)	

**FLOATING FORK
CARRIAGE 12,100 LB**

ATT-03-040

Fork carriage with a load capacity of 12,100 lb. The 3' 11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FC 5,5T FIX			
			
12,100 lb	3'11"	0.7' (min.) - 3'5" (max.)	✓

**FLOATING FORK
CARRIAGE 13,200 LB**

ATT-03-004

Fork carriage with a load capacity of 13,200 lb. The 3' 11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FC 6T FIX L S			
			
13,200 lb	3'11"	1'11" (min.) - 3'5" (max.)	✓

FLOATING FORK CARRIAGE 15,400 LB

ATT-03-011

Fork carriage with a load capacity of 15,400 lb. The 3' 11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FC 7T FIX S			
15,400 lb	3'11"	1'11" (min.) - 3'5" (max.)	✓

FEM FORK CARRIAGE 11,000 LB

ATT-03-060

FEM fork carriage with a load capacity of 11,000 lb and width of 3' 8". The 3' 11" long, laterally sliding forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks.

FCF 5T I FIX			
11,000 lb	3' 11"	0' 9" (min) - 3' 5" (max)	✓

FEM FORK CARRIAGE WITH SIDESHIFT

ATT-03-061

FEM fork carriage with a load capacity of 7,700 lb and width of 3' 6". The 3' 9" long laterally sliding forks are controlled directly from the cab with a hydraulic sideshift, and are ideal for handling all types of palletised loads and any other application requiring non-floating forks.

FCTF 3.5T FIX			
7,700 lb	3' 11"	1' 3" (min.) - 3' 3" (max.)	✓

FEM FORK CARRIAGE WITH POSITIONER

ATT-03-062

FEM fork carriage with a load capacity of 7,700 lb and width of 3' 6". The 3' 9" long forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks. Equipped with a positioner that moves the individual forks hydraulically.

FCPF 3.5 FIX			
7,700 lb	3' 7"	1' 2" (min) - 3' 4" (max)	✓

FEM FORK CARRIAGE WITH SIDESHIFT AND POSITIONER

ATT-03-063

FEM fork carriage with a load capacity of 7,700 lb and width of 3' 6". The 3' 9" long forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks. Equipped with a positioner to hydraulically move the individual forks and a hydraulic sideshift to slide them laterally, directly from the cab.

FCTF 3.5 FIX			
7,700	3' 7"	1' 2" (min) - 3' 4" (max)	✓

FEM FORK CARRIAGE FOR TH

ATT-03-043

FEM fork carriage with a load capacity of 13,200 lb and width of 4'3". The 3'11" long, laterally sliding forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks.

FCF 1,3 FIX			
13,200 lb <i>* The actual capacity will depend on the machine to which the attachment is mounted (10,000 lb; 11,000 lb; 12,100 lb)</i>	3'11"	0.9' (min.) - 4'4" (max.)	✓

FORK CARRIAGE WITH POSITIONER

ATT-03-045

Fork carriage for the TH range (excluding TH 3.6), width of 3' 4". The 3' 11" long forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks. Equipped with a positioner that moves the individual forks hydraulically.

FCP FIX

FORK CARRIAGE 17,600 LB - WIDE VERSION WITH 6' LONG FORKS AND POSITIONER

ATT-03-058

Fork carriage with a load capacity of 17,600 lb and width of 6'. The 6' extended length forks are ideal for handling bulky palletised loads and any other application requiring non-floating forks. Equipped with a positioner that moves the individual forks hydraulically.

FCP 8T 72x72

			
17,600 lb	6'	6'	✓

FEM FORK CARRIAGE
17,600 LB

ATT-03-037

FEM fork carriage with a load capacity of 17,600 lb and width of 4'3". The 3'11" long, laterally sliding forks are ideal for handling all types of palletised loads and any other application requiring non-floating forks.

FCF 8T SH 1,3			
			
17,600 lb	3'11"	1'0.6" (min.) - 4'4" (max.)	✓

FLOATING FORK CARRIAGE
22,000 LB

ATT-03-047

Fork carriage with a load capacity of 22,000 lb. The 3' 11" floating forks enable the load to be picked up even from uneven surfaces. The forks can be locked in the transport position for greater safety on the road.

FC 10T			
			
22,000 lb	4'2"	1'11" (min.) - 3'5" (max.)	✓

FLOATING FORK CARRIAGE 28,600 LB WITH POSITIONER

ATT-03-021

Fork carriage with a load capacity of 28,600 lb. The 3' 11" floating forks enable the load to be picked up even from uneven surfaces. Equipped with a positioner that moves the individual forks hydraulically. Grille for load protection and support included.

FCP 13T

28,600 lb	4'2"	2'9" (min.) - 5'10" (max.)	

FEM ROTATING FORK CARRIAGE WITH TILT

ATT-03-002

Rotating fork carriages with tilt function designed for handling bulky loads in tight spaces. Unlike standard forks, they can rotate and tilt, allowing the orientation of the load to be adjusted during loading and unloading. They offer a frontal load capacity of up to 11,000 lb, a rotated load capacity of up to 5,500 lb, 360° continuous rotation and a tilt of up to 70°.

RFCT 5

11,000 lb	3'11"	2'9"	360°	

FEM ROTATING FORK CARRIAGE

ATT-03-041

Rotating FEM fork carriage designed for handling bulky materials in confined spaces. Full 360° rotation up to a height of 9'10". Above 9'10" the maximum rotation is +/- 90°, automatically limited depending on the working conditions. The forks can be fitted with a manual rotation lock that reduces the working angle to +/- 90°. This attachment offers a frontal load capacity of 11,000 lb and 5,500 lb rotated load capacity. The frontal load capacity of the attachment will depend on the model of machine to which it is mounted.

RFC 5					
					
11,000 lb	3'11"	3'8"	45°	360°	✓

LOAD PROTECTION GRILLE FOR FLOATING FORK CARRIAGES

ATT-03-038

Grille for load protection and support that can be combined with floating fork carriages to retain the load and increase operator safety.

PC	
	

9.8" x 2.4"

LOAD PROTECTION GRILLE FOR FEM FORK CARRIAGES

ATT-03-005

LATTICE BOOMS WITH/ WITHOUT WINCH

Precise and versatile, lattice booms are the ideal solution, whatever the job. They easily adapt to varying conditions, always offering the best solution to any problem.

Check the compatibility and capacity of each attachment with your dealer.

LATTICE BOOM WITH SINGLE PULL WINCH 1,750 LB

ATT-04-005

Lattice boom with integral winch, extends the reach by an additional 5'7". Ideal for handling light and bulky loads, even in hard-to-reach areas. Maximum load capacity of 1,750 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 800					
1,750 lb	23'11"	0.4"	98'5"	197 ft/min	✓

LATTICE BOOM WITH SINGLE PULL WINCH 2,000 LB

ATT-04-028

Lattice boom with integral winch, extends the reach by an additional 12'7". Ideal for handling light and bulky loads, even in hard-to-reach areas. Maximum capacity of 2,000 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 900					
2,000 lb	12'8"	0.4"	79/144 ft	157 / 79 ft/min	✓

LATTICE BOOM WITH SINGLE PULL WINCH 3,300 LB

ATT-04-011

Lattice boom with integral winch, extends the reach by an additional 7'2". Ideal for handling light and bulky loads, even in hard-to-reach areas. Maximum capacity of 3,300 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 1500

3,300 lb	7'1"	0.4"	79'	170 ft/min	

LATTICE BOOM WITH DOUBLE PULL WINCH 4,400 LB

ATT-04-015

Lattice boom with integral winch, extends the reach by an additional 6'7". Ideal for handling light and bulky loads, even in hard-to-reach areas. Maximum capacity of 4,400 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 2000

4,400 lb	7'10"	0.4"	79'	79 ft/min	

LATTICE BOOM WITH SINGLE PULL WINCH 6,000 LB

ATT-04-017

Lattice boom with integral winch, extends the reach by an additional 5'7". Ideal for handling light and bulky loads, even in hard-to-reach areas. Maximum capacity of 6,000 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 2700					
					
6,000 lb	5'7"	0.5"	164'	98 ft/min	✓

LATTICE BOOM WITH SINGLE PULL WINCH 6,600 LB

ATT-04-019

Lattice boom with integral winch, extends the reach by an additional 5'7". Ideal for handling light and bulky loads, even in hard-to-reach areas. Maximum capacity of 6,600 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 3000					
					
6,600 lb	5'7"	0.5"	164'	98 ft/min	✓

LATTICE BOOM WITH HOOK 1,300 LB

ATT-04-001

Lattice boom with type-approved swivel hook that extends the reach by an additional 13'. Ideal for lifting light and bulky loads even in hard-to-reach areas. Maximum capacity of 1,300 lb. Tubular structure to improve the size/capacity ratio.

J 600		
1,300 lb	12'11"	✓

JIB WITH 4,400 LB [3' 9"] HOOK

ATT-04-002

Double T-shaped jib with approved swivel hook allowing the reach to be increased by an additional 3' 9". Ideal for lifting bulky loads up to 4,400 lb, even in difficult areas.

JS 2000					
4,400 lb	3' 9"	-	-	-	✓

**BOX-SHAPED BOOM
WITH HOOK 4,400 LB**

ATT-04-013

Double-T box-shaped boom with type-approved swivel hook that extends the reach by an additional 8'10". Ideal for lifting bulky loads of up to 4,400 lb even in hard-to-reach areas.

J 2000		
		
4,400 lb	9'9"	✓

**BOX-SHAPED BOOM
WITH HOOK 8,800 LB**

ATT-04-024

Box-shaped boom with type-approved swivel hook that extends the reach by an additional 6'7". Ideal for lifting bulky loads of up to 8,800 lb even in hard-to-reach areas.

J 4000		
		
8,800 lb	6'7"	✓

BOX-SHAPED BOOM WITH TWO HOOKS 4,400 LB - 15,400 LB

ATT-04-027

Boom with 2 integral type-approved swivel hooks with a load capacity of 4,400/15,400 lb. The innermost hook has the larger load capacity, and allows the reach to be increased by an additional 9'3".

J 2000 / 7000		
4,400 / 15,400 lb	9'3"	✓

LATTICE BOOM WITH WINCH, SINGLE PULL 1,750 LB / DOUBLE PULL 3,300 LB

ATT-04-007

Lattice boom with integral winch, adjustable to two different lengths and load capacities. Fully extended, extends the reach by an additional 13' with a single pull load capacity of 1,750 lb. When used in the retracted configuration, at a length of 1,750/3,300 lb, the double pull load capacity can lift loads of up to 3,300 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 800/1500					
1,750 / 3,300 lb	23'4" / 10'10"	0.4"	144' / 79'	157 / 79 ft/min	✓

**HYDRAULIC TELESCOPIC
BOOM WITH HOOK
3,300 LB / 5,500 LB**

ATT-04-021

Telescopic boom with box section adjustable to two different lengths and load capacities, equipped with a type-approved swivel hook. When fully extended, the reach is increased by a further 8'10" with a load capacity of 3,300 lb. When used fully retracted, the reach is 5'11", with load capacity increased to 5,500 lb.

JT 2500			
5,500 lb (retracted) - 3,300 lb (extended)	5'10" (retracted) - 8'10" (extended)	3'3"	✓

**LATTICE BOOM WITH WINCH,
SINGLE PULL 2,650 LB /
DOUBLE PULL 6,600 LB**

ATT-04-009

Lattice boom with integral winch, adjustable to two different lengths and load capacities. Fully extended, increases the reach by an additional 14'9" with a single pull load capacity of 2,650 lb. When used in the retracted configuration, at a length of 5'3", the double pull load capacity can lift loads of up to 6,600 lb. Tubular structure to improve the weight/capacity ratio. The winch is equipped with a rope pressure roller and hydraulic limit switch system for rope raising/lowering.

JW 1200/3000					
2,650 / 6,600 lb	14'9" / 5'3"	0.4"	157' / 82'	157 / 79 ft/min	✓

SWAN-NECK BOOM WITH HOOK 6,600 LB

ATT-04-023

Swan-neck boom equipped with a type-approved swivel hook that extends the reach by an additional 4'11". Ideal for handling loads of up to 6,600 lb even in confined spaces, attics and plant nurseries.

JCC 3000			
			
6,600 lb	-	3'6"	✓

BOX-SHAPED BOOM WITH HOOK 17,600 LB

ATT-04-026

Box-shaped boom with type-approved swivel hook that extends the reach by an additional 10'. Ideal for lifting bulky loads of up to 17,600 lb even in hard-to-reach areas.

J 8000		
		
17,600 lb	10'7"	✓

**BOOM WITH 3 HOOKS,
44,100 LB - 33,100 LB -
22,000 LB**

ATT-04-008

Boom with 3 integral type-approved swivel hooks with a load capacity of 22,000/33,100/44,100 lb. The innermost hook has the largest load capacity, and allows the reach to be increased by an additional 6'7".

J 20 S-3		
		
22,000 / 33,100 / 44,100 lb	7'4"	✓

HOOKS

Simple and yet extremely versatile and durable, Magni type-approved hooks have a vast range of applications in construction. The range includes hooks of various load capacities in response to specific requirements, always with the best performance.

Check the compatibility and capacity of each attachment with your dealer.

HOOK 6,600 LB

ATT-05-004

Type-approved 360° swivel hook with safety catch, designed for handling suspended loads. Load capacity up to 6,600 lb. Metal storage support included.

HS 3			
			
6,600 lb	1'5"	✓	✓

HOOK 11,000 LB

ATT-05-014

Type-approved 360° swivel hook with safety catch, designed for handling suspended loads. Load capacity up to 11,000 lb. Metal storage support included.

H 5			
			
11,000 lb	1'7"	✓	✓

HOOK 13,200 LB

ATT-05-001

Type-approved 360° swivel hook with safety catch, designed for handling suspended loads. Load capacity up to 13,200 lb. Metal storage support included.

H 6			
			
13,200 lb	1'7"	✓	✓

HOOK 15,400 LB

ATT-05-002

Type-approved 360° swivel hook with safety catch, designed for handling suspended loads. Load capacity up to 15,400 lb. Metal storage support included.

H 7			
			
15,400 lb	1'2"	✓	✓

HOOK 17,600 LB

ATT-05-003

Type-approved 360° swivel hook with safety catch, designed for handling suspended loads. Load capacity up to 17,600 lb. Metal storage support included.

H 8			
			
17,600 lb	2'11"	✓	✓

HOOK 22,000 LB

ATT-05-005

Type-approved 360° swivel hook with safety catch, designed for handling suspended loads. Load capacity up to 22,000 lb. Metal storage support included.

H 10			
			
22,000 lb	1'2"	✓	✓

HOOK 28,600 LB

ATT-05-013

Type-approved 360° swivel hook with safety catch. Its compact design and load capacity of up to 28,600 lb make it ideal for transporting the heaviest suspended loads.

H 13

			
28,600 lb	11"	✓	✓

HOOK 35,300 LB

ATT-05-007

Type-approved 360° swivel hook with safety catch. Its compact design and load capacity of up to 35,300 lb make it ideal for transporting the heaviest suspended loads.

H 16S

			
35,300 lb	1'8"	✓	✓

HOOK 44,100 LB

ATT-05-008

Type-approved 360° swivel hook with safety catch. Its compact design and load capacity of up to 44,100 lb make it ideal for transporting the heaviest suspended loads.

H 20S			
			
44,100 lb	1'8"	✓	✓

HOOK 66,100 LB

ATT-05-009

Type-approved 360° swivel hook with safety catch. Its compact design and load capacity of up to 66,100 lb make it ideal for transporting the heaviest suspended loads.

H 30S			
			
66,100 lb	1'4"	+/- 30°	✓

HOOK 88,100 LB (NARROW)

ATT-05-011

Type-approved 360° swivel hook with safety catch. Its compact design and load capacity of up to 88,100 lb make it ideal for transporting the heaviest suspended loads.

H 40S

			
88,100 lb	1 1/4"	+/- 30°	

HOOK 110,200 LB

ATT-05-012

Type-approved 360° swivel hook with safety catch. Its compact design and load capacity of up to 110,200 lb make it ideal for transporting the heaviest suspended loads.

H 50

			
110,200 lb	2 1/6"	+/- 30°

CLAMPS

Designed specifically for mining and quarrying applications, as well as the logistics sector, our clamps offer unrivalled versatility and performance. The range has been specifically designed to handle even the toughest conditions.

Check the compatibility and capacity of each attachment with your dealer.

RIBS CLAMP 8,800 LB

ATT-06-001

Clamp with a load capacity of 8,800 lb, made of high-strength material, for installing supporting arch ribs in tunnel construction applications. 65° rotation and 46° tilt for precise rib installation.

RC 4T			
			
8,800 lb	46°	+/- 65° (manual)	✓

3D-FILM HANDLER 5,500 LB

ATT-06-002

The 3D-Film handler is designed for the film industry, and features a surface designed to support equipment like LED panels or light diffusers during studio and location shoots. It has a load capacity of 5,500 lb and offers a full 360° of rotation.

3DF 2,5			
			
5,500 lb	360°	360°	✓

TYRE HANDLER 5,500 LB - 25"

ATT-06-003

Tyre handler with a load capacity of 5,500 lb, ideal for handling tyres from 4' to 7'8" diameter. Hydraulic opening/closing, can be rotated through 360°. Non-slip forks assure that the tyre is held securely. OPT-02-022 "Double hydraulic output at the boom head", required to use the clamp, must be ordered separately

SPECIAL EQUIPMENT

This category covers our attachment range for specialised applications. From removing large trees to cleaning roads with snow ploughs or installing glass panels high up on tall buildings - Magni always has the best solution for specialised requirements.

Check the compatibility and capacity of each attachment with your dealer.

TREE CUTTER BOOM WITH CLAMP 3,300 LB

ATT-08-005

Tree cutter boom with clamp designed for felling and handling tree branches. The unit offers fast, efficient and safe operation for tree maintenance and branch removal. The combination of boom, tilting clamp and chainsaw enables smaller sections of the tree to be removed from any direction, facilitating immediate clearing. On suitably equipped machines, thanks to the availability of kit solutions, it is a plug-and-play solution. OPT-05-001 pre-arrangement kit and OPT-05-005 boom protection kit for tree cutters and dusty environments required

TREE CUTTER

ATT-08-001

Clamp with chainsaw for felling and removing trees which are dangerous or in challenging locations, like urban and residential areas, along roadsides and railway lines. On suitably equipped machines, thanks to the availability of pre-arrangement and boom protection kits, it is a plug-and-play solution. The attachment features a saw unit with spring suspension which prevents the blade flexing when force is applied. Thanks to the Power Tiltator, the clamp can rotate through 360°, thus enabling a secure grip on the branch or tree even in the most challenging positions. OPT-05-001 e OPT-05-005 pre-arrangement kit required.

PAPER CLAMP 7,050 LB

ATT-08-018

Clamp designed for recycling, heavy-duty logistics and paper/cellulose supply chain applications. Designed to assure an unobstructed view of the chassis from any angle. The optimised boom profile provides outstanding performance without compromising the strength of the assembly. The chassis is steel, the boom bars in extruded steel alloy, and the boom bases are in cast iron, for excellent durability and reliability. Built-in hydraulic flow diverters and a two-way pressure regulator valve assure fast, synchronised operation of the booms.

ET-HOVER-UNIVAC VACUUM LIFTING ATTACHMENT

ATT-08-007

The eT-Hover-univac vacuum lifting attachment is designed to safely handle glass, ceramic and metal panels. It can lift loads of up to 1,550 lb in the horizontal and vertical orientations. Thanks to its modular structure, the lifting device can be adjusted to fit the size of the part. Four additional suction cups are included for handling even larger panels, up to the maximum load of 1,550 lb. But even in its basic configuration with 4 suction cups, it can lift up to 790 lb in the vertical orientation and 1,100 lb in the horizontal orientation. The attachment comes with handy compact remote control for the vacuum function. Winch for attachment handling required (not included).

ET-LITOCRAN700 TELESCOPIC VACUUM HANDLER

ATT-08-021

The attachment combines a 3D head with a telescopic boom which extends up to 10'6" from the fixed or rotating telescopic handler's boom head. The tip of the attachment's boom is equipped with the vacuum head. A remote control enables the unit to be controlled precisely in any direction. Ideal for the safe handling of glass, ceramic and metal panels. It can lift loads of up to 1,550 lb in the horizontal and vertical orientations. The panels can be tilted 90° and rotated through 360° by hand. The four additional suction cups included in the kit enable larger panels to be handled by adapting the handler to the size of the panel, up to the maximum load of 1,550 lb. But even in its basic configuration with 4 suction cups, it can lift up to 1,100 lb in the vertical orientation and 790 lb in the horizontal orientation. The attachment charges in about 4 hours, and a full charge provides 8 hours of operation. A handy compact remote control for the vacuum function is included.

SNOW PLOUGH BLADE

ATT-08-009

Snow plough blade with a steel frame and quick-coupling counterplate (DIN 76060/A compliant), or alternatively a three-point bracket for three-point front hitches as typically found on agricultural machinery. The front edge of the blade is constructed in two all-steel sections. The scraper blade is made of six independent wear-resistant steel sectors. The unit features an impact mitigation system with adjustable steel springs on each individual sector of the scraper blade. These flex backwards (against the direction of travel) in the event of a collision. It also has an overpressure valve to dampen side impacts, with R2 hydraulic pipe and unified quick fittings and couplings. The LTL blade can be configured as a wedge, as a single tilted blade facing left or right, or as an inverse wedge (spoon).
